

Steve Woloz Associates Introduces Project Management (PM)

Bulletin 1: Introduction

1 Why

Compression of the product life cycle is perhaps the one most significant and driving force for project managers and management of projects. The key thing about projects is that you must get it right the first time around. You often wont get a “ second kick at the can.

2 About our course:

Our course provides a unique combination of project management principles, practical examples derived from real life experiences, and training in the tools and templates to put these principles into practice right away.

3 Are you aware that :

- A META Group report study indicates that 77% of respondants point to lack of PM skills is the major issue in successfully delivering projects (PM Network, Aug 2004, pg 25)
- According to Price Waterhouse Coopers, ‘Project Success through Risk Management’, D.Tilk, 2003,
 - **25% of projects succeed**
 - **50% are completed late or over budget**
 - **25% fail completely and never finish**

4 OUR TEAM

In order to improve your percentages of success, let Steve Woloz Associates Inc. (SWA) proven coaching methodology help you. Team SWA is pleased to announce that Mr. Lloyd Bartlett and Mr. Spiro Theopoulos, both PM lecturers at Mc Gill University, will now be presenting in house customized Project Management coaching as a part of Steve Woloz Associates Inc. (see [Our Professional Team](#) to read their Bios)
